### Hosting, Domain & Email Services

We recommend to our clients web hosting services tailored to their specific needs and can assist with finding and setting up hosting. We recommend hosting on your local dial-up ISP or FREE hosted sites ONLY if your page is very simple and basic since they are usually not well-prepared to meet specialized business site hosting needs. We can recommend a Web host service for you in your price range. Your hosting and domain are not included in your web design costs; they are an ongoing yearly charge.

**Hosting:** If you have special needs or requirements are related to bandwidth or storage, you may require a virtual dedicated server so your increased bandwidth doesn't impact others on the host machine. Sometimes you might want interested persons to contact you. A reply-type form uses different kinds of programming. We can add a response form to one of your pages. This is done from the server with PHP, CDO or CDONTS. Which you can use is dependent upon the server's capability. **Note:** You can set up sites that use the response form as an order form, but it will not include a secure server and secure order pick-up, so you cannot take credit card or any sensitive information in this way. This may be fine for requesting literature, information, etc. We charge extra to set up a secure ordering system.
